- Peoples Gas Illinois

#### Pennsylvania

- Columbia Gas of Pennsylvania
- National Fuel
- PECO
- Peoples
- PNG/CPG/UGI

#### Ohio

- Columbia Gas of Ohio
- Duke Energy
- Dominion Energy
- Vectren

### Product Availability

Firm and interruptible delivery options are available in a number of competitive markets. Monthly and daily balancing options are also offered, depending on the utility. Single utility consolidated billing is available in addition to dual billing where required in certain markets and for customers who meet daily volume requirements.

Firm delivery with monthly balancing is available for all utilities

- Firm delivery with daily balancing available
- Interruptible delivery available

# Simplify Your Supply Chain with Commodity Aggregation

As natural gas and electricity supply has become more commoditized, a limit has emerged in the hard-dollar savings that can be realized through competitive pricing alone. However, commodity aggregation or supplier consolidation could offer a path to deliver further economic value—while simplifying your supply chain.

## Reduced Purchased Costs

Buying power increases when the number of suppliers is reduced—and so does the supplier's ability to become a strategic partner on critical business initiatives, including sustainability, risk mitigation, localization, and innovation.

## Reduced Procurement and Supplier Management Costs

Fewer suppliers mean lower interaction costs. A recent independent, third-party study\* supports that statement, demonstrating increased ease in automating interactions. This frees up staff and generally results in a total steady-state cost for purchase that is 64% lower than organizations with several suppliers.

## Reduced Noncompliance

The study\*\* also illustrated that companies can yield 1% to 2% savings in spend when they engage with and actively manage fewer suppliers who have capable processes and systems. It also simplifies the complexities of monitoring regulatory requirements.
