
A Sustainable Foundation for the Ultimate Flooring Provider

DOING GOOD. TOGETHER.

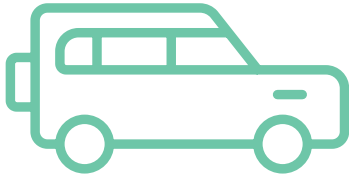

That's the foundation of Tarkett's sustainability efforts. With one of the largest portfolios of flooring and sports solutions in the world, the company aims to make a considerable impact when it comes to environmental responsibility.

Since 2016, ENGIE has supported Tarkett's strategy, supplying renewable energy certificates (RECs) to offset the carbon emissions of the company's North American headquarters and manufacturing sites in Ohio. For three years, the company added an estimated 30 million kWh of demand to the marketplace for carbon-neutral energy generation.

In August 2019, Tarkett began receiving physical green supply from a nearby wind farm through a renewal agreement with ENGIE to power nine sites. The deal also included national Green-e® certified RECs to further support the development of renewable assets.

By 2025, Tarkett will have procured 230,908 RECs, demonstrating considerable strength in low-carbon leadership and a significant display in carbon offset. The impact will be equivalent to the emissions from, displaced, or sequestered by the following:

GREENHOUSE GAS EMISSIONS FROM:

34,668

Passenger vehicles driven for one year

399,234,286

Miles driven by an average passenger vehicle

CARBON DISPLACED BY:

178,509,390

Pounds of coal burned

18,383,672

Gallons of gasoline consumed

16,039,963

Gallons of diesel consumed

6,675,118

Propane cylinders used for home barbeques

378,044

Barrels of oil consumed

28,475

Homes' annual electricity use

19,553

Homes' annual energy use

2,162

Tanker trucks of gasoline

891

Rail cars of coal burned

CARBON SEQUESTERED BY:

2,699,982

Tree seedlings grown for 10 years

192,176

Acres of US forest in one year

1,325

Acres of US forest preserved from cropland
