

Physical Green Supply | easyRE

Delivering Sustainable Value - with Fast Progress

easyRE gives customers the ability to contract physical volumes of renewable energy, primarily wind or solar, direct with generators or through intermediaries.

Physical volumes are incorporated into traditional retail supply contracts along with RECs. RECs are either contracted off the same asset or supplemented through the Green-e® certification program to optimize costs and mitigate regulatory premiums in non-ERCOT markets.

Physical transactions enable marketing claims tied to a specific source, and firm volume and fixed-price offerings ensure predictability in month-to-month costs.

WHO can benefit?

- Companies with ambitious renewables targets who are looking to make fast progress.
- Organizations aiming to reduce environmental impact – and market their actions – within one to two months.
- Customers with load following fixed-price or block-and-index contract structures.
- Environmentally responsible businesses with low-risk appetites.

WHY consider easyRE?

- Significant sustainability impact
- Marketing rights to reference specific renewable assets
- Rapid turnaround time to project initiation (weeks/months)
- Flexible term and pricing options
- High budget certainty
- Simplified contracting through standard commodity retail supply agreements
