

ENGIE ADVANTAGE

Best-in-Class Energy Supply +
Simple On-Bill Funding for Energy Projects

MEET ENGIE ADVANTAGE

Improve your bottom line and exceed your sustainability goals while offsetting capital investment with ENGIE. With the expertise to aggregate utility incentives, tax benefits (if eligible), and applicable grant funding, ENGIE designs and applies comprehensive projects that provide robust energy savings and an attractive ROI. ENGIE's on-bill funding solutions allow energy-efficiency projects of any size and scale to be implemented quickly and effectively.

With ENGIE ADVANTAGE, your business enterprise can expect:

- **REDUCED OVERALL ENERGY SPENDING**

You'll see an immediate improvement in the cost structure of the products and services your business offers.

- **NO INITIAL CAPITAL EXPENDITURE REQUIRED**

ENGIE will foot the entire cost of the energy project, freeing up capital for you to deploy elsewhere to grow your business.

- **AN ADAPTABLE CONTRACT TERM OF 36 TO 84 MONTHS**

The duration can be shaped to meet the cash flow requirement of your business.

- **DEFERRAL OF PAYMENT FOR UP TO 24 MONTHS**

Your business will benefit from cost savings immediately, even if you're currently with another electricity supplier.

- **SEAMLESS INTEGRATION WITH ENERGY SUPPLY**

The cost of your energy-efficiency project will appear as a single line item on your electricity bill.

- **NO LIEN WILL BE PLACED ON THE NEW EQUIPMENT**

The accounting treatment of your energy project can be flexible.

Additional Non-Energy Savings (\$)			762.12
ENGIE ADVANTAGE Cost (\$)			-7,488.87
Net Monthly Savings (\$)			1,222.83

TYPICAL PROJECT SCOPE

- Building automation and controls
- Lighting retrofits and controls
- Compressed air leak detection and repair
- Pumps, fans, motors, and drives
- Heating, ventilation, and air conditioning (HVAC)
- On-site generation of electricity
- Boiler system improvements

ANNUAL SAVINGS

First four years: **\$14,674**
Each year thereafter: **\$104,540**

PROGRAM BENEFITS

- Seamless integration with your energy supply contracts, eliminating risk
- Defrayal of investment expenditure
- Reduction of operating expense for immediate savings
- Flexible balance sheet treatment
- Leverage of ENGIE's experience collecting incentives
- Integrated energy projects through commodity bill payment

"We want to offer customers a global approach and solution: a detailed analysis of their needs, leading to a complete overhaul of energy uses to drastically reduce consumption, replacing old equipment with smart energy-efficient equipment, supplying it with green energy. And we will finance it all at a competitive price."

- Isabelle Kocher, CEO, ENGIE
