Electricity Facts Label (EFL)

ENGIE Resources LLC

FIXED PRICE PRODUCT – SMALL COMMERCIAL

Texas-New Mexico Power Electric Delivery Service Area

10/01/2026

Electricity Price

Average Monthly Use	1,500kWh	2,500kWh	3,500kWh
Average price per kWh	15.0¢	14.8¢	14.7¢
For POLR use: minimum price per kilowatt-hour	19.8¢	19.4¢	19.4¢

The average price for electric service shown in the box above reflects a monthly $8.36 base charge per account, an energy charge of 14.4¢ per kilowatt-hour, and all existing recurring charges, excluding state and local sales taxes, and reimbursement for the state miscellaneous gross receipts tax. Your average price for electricity may vary according to your exact monthly usage.

You may be subject to a special charge from your TDSP that is not included in the total average price for electric service. If you are subject to a TDSP special charge, you may contact ENGIE Resources at 1-866-693-6443 to determine the price and applicability of the special charge.

Other Key Terms and Questions

See "Terms of Service" for a full listing of fees, deposit policy, and other terms.

Disclosure Chart

Type of Product:	Fixed Rate Product
Contract Term:	12-month minimum
Do I have a termination fee associated with terminating service?	If customer cancels or terminates their contract, terminates or discontinues service, switches service to another supplier, or transfers service to the default service provider after the Effective Date (*as such term is defined in your contract*) or during the Transaction Term (*as such term is defined in your contract*), customer will be charged an Early Termination Fee (hereinafter "ETF"). ENGIE may terminate the contract: (a) if customer's utility/distribution company removes customer from the consolidated billing program and requires that ENGIE bill customer separately for energy supply; or (b) customer fails to make any payment or deposit when due; or (c) customer has filed a petition or otherwise commences a proceeding under a bankruptcy law or (d) breaches a material representation or obligation under this Agreement. If ENGIE terminates the contract for one of the reasons set forth, customer will be charged an ETF and remain obligated to pay for all electricity received and any interest, fees and penalties incurred by ENGIE. The ETF is calculated as set forth in table below:

ANNUAL USAGE BY METER (kWh)	ETF FEE (PER METER) x REMAINING MONTHS IN CONTRACT TERM
0-199,999	$250
200,000-499,999	$500
500,000-999,999	$1000

The ETF shall be due within 15 Business Days of written notice to customer. No ETF fee will be due if customer discontinues service at a facility prior to the End Date *(as such term is defined in your contract*) due to the sale or closure of the facility address, provided that customer provides thirty (30) days advance written notice to ENGIE, a forwarding address, and other evidence required by ENGIE verifying that customer has sold or no longer occupies the facility. Customer will remain responsible for the billing and payment obligations until ENGIE service is terminated, switched to another provider, transferred to the default service provider, or otherwise discontinued.

	If my price can change, how will it change, and by how much?	The price applied in the first billing cycle may be different from the price in this EFL solely to reflect actual changes in TDU Delivery Charges, TDU Surcharges, changes to the Electric Reliability Council of Texas ("ERCOT") or the Texas Regional Entity ("TRE") administrative fees charged to loads, or changes resulting from federal, state or local laws that impose new or modified fees or costs that are outside of our control. If there is a change in law, administrative regulation, tariff, or any fees or costs imposed by the applicable ISO or by a governmental authority, or a change in ISO/RTO Operations, market structure, congestion zone design, or protocols, or a change in application or interpretation, and such change causes ENGIE to incur costs relating to the provision of services herein, such costs shall be passed through to Customer.
	What other fees may I be charged?	Charges for nonrecurring fees will be listed as a separate line item on your monthly bill. Please refer to the "Terms of Service" document under the Contract Price and Billing & Payment Terms sections for more detailed information. The Contract Price does not include Taxes or Utility Related Charges. Utility Related Charges means charges by a utility from transmission and distribution (including network transmission); stranded costs or transition costs; system reliability, rate recovery, under-collections, amortization, and market purchases or energy load repurchases.
	Is this a pre-pay or pay in advance product?	No
	Does the REP purchase excess distributed renewable generation?	No
	Renewable content:	This product is 2.35% renewable.
	The statewide average for renewable content is:	37.2% of statewide average for renewable content.
